

Place heel
here

Follow these simple steps to determine your child's shoe size;

Print this page and ensure that **NO scaling** options have been selected. Be sure to check the CM measure with a ruler to ensure accurate printing.

Place the sizing chart on the floor, preferably a hard (not carpeted) surface.

Get your child to stand tall with their heel in the arch and read the size at the end of the toe.

Measure both feet and use the longest measurement. If the measurement is between 2 sizes select the larger size.

Select your shoes and place your order.

Please Note:

Whilst every effort has been made to ensure accuracy of this sizing chart it should be considered as a guide. Differing manufacturing processes can result in varying shoe size brands. If you have any further questions please email us at info@madisonlane.com.au
